**Subject:** USG Walworth Information  
[USG Stk Test 7-14.xlsx](#)  
[USG walworth calc.xls](#)

Welcome back.

Wisconsin is interested in seeing the information we used to justify listing USG-Walworth. They understand we (you) used their modeling files, so there's less concern about that than about the emissions/throughput spreadsheets. Are there any CBI issues with sending them the spreadsheet?

I've attached a copy as I have amended it, a version that includes some additional calculations and a new spreadsheet that compiles annual emissions/throughput data for 1991 to 2001. I suppose I would also send them calculations (also attached) based on the stack test using data from the stack test report.
